Sent:	Christner, Jan Mon 8/10/2015 3:51:28 PM RE: Animas response
Wendy,	
purpose s	st thing is to take the recent database and use all values. Is that adequate for this ince you need the data quickly, or do you need average spring and fall concentrations of the last 5 years represented evenly where data is available.

Hi Jan,	
involved to values of	ing with Marty and many others here on the Animas response. I understand you were in looking at the historical values early in the response. We need to know the average historical surface water data for the complete analyte list, both total and dissolved. Can s those values ASAP?
Also, can	you please share with Kristen the eco values you have been working on for Dan Wall?
Thanks.
